

K T LIKHITH

Programmer Analyst with 1+ years of industry experience and a Master's degree in Cloud Computing. Proven expertise in production support, incident management, and cloud-based DevOps practices. Experienced in supporting simulation environments at Continental and delivering application reliability at Cognizant. Hands-on with AWS, CI/CD pipelines, Docker, Kubernetes, and Linux systems with strong focus on automation, troubleshooting, and operational excellence.

WORK EXPERIENCE

Continental Automotive Component India Pvt Ltd

Software Engineering Intern

Jun 2023 - Jun 2024

- Developed synthetic LiDAR data using CarMaker (C++) and visualized point-cloud outputs to support sensor testing and validation
- Built and maintained a synchronized simulation environment for RDI, CDI, and LDI systems, ensuring stable and continuous test execution
- Designed custom driving scenarios in CarMaker to enable realistic, repeatable, and automated validation workflows
- Extracted, processed, and validated camera sensor image data using dSPACE tools for accuracy and reliability
- Generated synthetic camera sensor data and implemented custom validation scenarios using dSPACE to simulate real-world conditions

Cognizant Technology Solutions

Programmer Analyst

Oct 2021 - Nov 2022

- Monitored application health and infrastructure using AWS CloudWatch and Grafana tracked CPU, memory, and API response times to detect issues early
- Analyzed 4xx/5xx error logs and API failures to identify root causes and prevent repeat incidents
- Maintained 98–99% SLA compliance handling 80–90 incidents/day using P1/P2 escalation protocols
- Performed Root Cause Analysis for production failures and documented findings in runbooks to improve future response
- Supported production deployments and validated post-release health metrics, coordinating rollbacks when needed
- Developed and maintained web applications fixed bugs and optimized performance to improve system stability

EDUCATION

Manipal School of Information Sciences (MSIS), MIT, Manipal

Master of Engineering, Cloud Computing - 8.59

Sep 2022 - Sep 2024

K.V.G College of Engineering, Sullia

Computer Science and Engineering - 7.95

Aug 2017 - Aug 2021

PROJECTS

CI/CD Pipeline for Node.js Web Application

- Built an end-to-end CI/CD pipeline on AWS EC2 using Jenkins automated build, test, and deploy stages triggered by Git commits
- Stored build artifacts in Amazon S3 and deployed applications using AWS CodeDeploy with custom AMIs and launch templates
- Configured Auto Scaling Groups and Application Load Balancers for high availability and zero-downtime deployments
- Integrated AWS CloudWatch to monitor error rates, latency, and resource usage set alarms for critical threshold breaches

Real World Capabilities of Data pipeline

- Developed a data pipeline using MinIO, Apache Spark, and Apache Iceberg.
- Dockerized Apache Spark, Iceberg, MinIO, and Jupyter Notebook for seamless deployment.
- Executed queries and captured data snapshots, storing them in MinIO buckets for efficient data management.

SKILLS

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD Pipelines, Git

Systems & Support: Linux, Production Support, Incident Management, Root Cause Analysis, JIRA, System Monitoring

Development: HTML, CSS, JavaScript, SQL, Snowflake, C++

CERTIFICATE

AWS Academy Graduate – AWS Academy Cloud Security Foundations.
