

K T LIKHITH

Cloud and DevOps Engineer with 1+ years of IT experience and an M.E. in Cloud Computing. Hands-on experience with AWS services, Docker, Kubernetes, Jenkins, Linux, Git, and CI/CD pipelines. Hands-on experience building and managing cloud infrastructure, deployment pipelines, and containerized applications. Interested in cloud and DevOps technologies and eager to contribute to building reliable and scalable solutions.

WORK EXPERIENCE

MicroDegree

Software Engineering Intern

Mar 2026 - Present

- Designed and deployed secure VPC architectures in AWS using private and public subnets, Implemented security groups and network ACLs to control inbound and outbound traffic
- Creating and Structuring alarms in Cloudwatch service for monitoring the server's performances, CPU utilization, disk usage etc. to take recommended action for better performance
- Designed and implemented highly scalable cloud infrastructure on AWS, resulting in a 75% increase in peak capacity to handle user traffic spikes
- Built and managed AWS infrastructure to support highly available and scalable applications
- Actively worked, managed and improved various AWS services like EC2, S3, VPC, Cloud front, IAM, Route53, Cloud Watch, Cloud Trail, RDS, including AWS Backup, Load Balancer, and Auto Scaling

Continental Automotive Components

Software Engineering Intern

Jun 2023 - Jun 2024

- Built synthetic LiDAR point cloud data using CarMaker and C++ to support sensor simulation for autonomous driving validation
- Designed a synchronized simulation environment that connected RDI, CDI and LDI systems together for accurate multi-sensor testing
- Created custom driving scenarios in CarMaker to test edge cases and support advanced ADAS validation workflows
- Extracted and processed camera image datasets using dSPACE tools to help with sensor data analysis and model validation
- Validated synthetic camera sensor outputs against custom test scenarios to make sure the simulation data was accurate and reliable

Cognizant Technology Solutions

Programmer Analyst

Oct 2021 - Nov 2022

- Designed and built UI components for an e-commerce website to improve the overall shopping experience for users
- Built cart functionality using JavaScript so users could add, update and remove items from their cart in real time
- Added keyboard navigation and focus management to make the application accessible for all types of users
- Managed code on Git and GitHub by creating branches, raising pull requests, fixing merge conflicts and working with the team
- Took part in code reviews to keep the code quality high and make sure the team was following best practices

SKILLS

Cloud & AWS: EC2, VPC, IAM, ELB, Auto Scaling, Route53, CloudFront, S3, RDS, NAT Gateway

DevOps & CI/CD: Jenkins, Docker, Kubernetes, Maven, CI/CD Pipelines, Git, GitHub, Terraform, Ansible

Monitoring: Prometheus, Grafana, CloudWatch

Web & Databases: HTML, CSS, JavaScript, MySQL

Programming: Java, C++

PROJECTS

AWS 3-Tier Highly Available Bookstore Application

- Built a complete 3-tier bookstore web app on AWS with React for the frontend, Node.js for the backend and MySQL RDS as the database
- Deployed the whole application across two AWS Availability Zones so that if one data center goes down, the app keeps running without any downtime
- Connected a custom domain ktlikhith.xyz through GoDaddy and Route53, and set up CloudFront as a CDN to make the app load faster for users
- Set up Auto Scaling Groups for both the web and app tiers so the infrastructure automatically handles more traffic when needed
- Placed all application and database servers in private subnets so they can only be reached through load balancers and not directly from the internet
- Used Security Groups to make sure each layer of the app can only talk to the layer directly above or below it, following least privilege principles
- Added NAT Gateways in each Availability Zone so private servers can connect to the internet for updates without being exposed publicly

EDUCATION

Manipal School of Information Sciences (MSIS),MIT, Manipal

Master of Engineering, Cloud Computing - 8.59 Sep 2022 - Sep 2024

K.V.G College of Engineering, Sullia, DK

Bachelor of Engineering, CSE - 7.95 Aug 2017 - Aug 2021

CERTIFICATE

AWS SOLUTIONS ARCHITECT - MicroDegree

AWS Academy Graduate – AWS Academy Cloud Security Foundations.

AWS Academy Graduate – AWS Academy Cloud Foundations.
