PROFESSIONAL SUMMARY

Programmer Analyst with 1+ years of industry experience and a Master's degree in Cloud Computing. Proven expertise in production support, incident management, and cloud-based DevOps practices. Experienced in supporting simulation environments at Continental and delivering application reliability at Cognizant. Hands-on with AWS, CI/CD pipelines, Docker, Kubernetes, and Linux systems with strong focus on automation, troubleshooting, and operational excellence.

TECHNICAL SKILLS

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD Pipelines, Git

Systems & Support: Linux, Production Support, Incident Management, Root Cause Analysis, JIRA, System Monitoring

Development: HTML, CSS, JavaScript, SQL, Snowflake, C++

PROFESSIONAL EXPERIENCE

Software Engineer Intern

Continental Automotive Components India Pvt. Ltd.

Jun 2023 – Jun 2024

Bengaluru, India

- Generated synthetic LiDAR data using CarMaker (C++) and visualized point-cloud outputs for testing and validation
- Built and maintained synchronized simulation environment for RDI, CDI, and LDI systems supporting advanced testing
- Created custom driving scenarios in CarMaker enabling realistic and repeatable validation workflows
- Extracted, processed, and validated camera sensor image data using dSPACE tools
- Collaborated with cross-functional teams to troubleshoot issues and improve environment stability for reliable test execution

Programmer Analyst

Cognizant Technology Solutions

Oct 2021 – Nov 2022

Bengaluru, India

- Developed and maintained web applications implementing new features, fixing bugs, and enhancing functionality to improve performance
- Provided production support handling 50+ tickets monthly via JIRA, troubleshooting and resolving platform-related issues
- Monitored application health and performance, proactively identifying issues to minimize downtime and ensure service continuity
- Performed Root Cause Analysis for production incidents, documented findings, and collaborated to implement permanent fixes
- Ensured stable production deployments and improved system reliability through collaboration with development teams

KEY PROJECTS

CI/CD Pipeline for Node.js Web Application

- Set up Jenkins on AWS EC2 with automated build and deployment triggered by Git commits
- Designed pipeline stages for build, version checks, and artifact storage in Amazon S3
- Deployed applications using CodeDeploy agents, AMIs, and launch templates
- Configured Auto Scaling Groups and Load Balancers achieving high availability and scalability

Real-World Data Pipeline Implementation

- Built end-to-end data pipeline using MinIO, Apache Spark, and Apache Iceberg for analytics
- Dockerized Spark, Iceberg, MinIO, and Jupyter Notebook ensuring consistent deployment across environments
- Executed complex analytics queries and managed data snapshots stored in MinIO buckets

EDUCATION

Master of Engineering in Cloud Computing

Manipal School of Information Sciences, MAHE

Sep 2022 – Oct 2024

CGPA: 8.59/10

Bachelor of Engineering in Computer Science & Engineering

K.V.G College of Engineering, Sullia

Aug 2017 – Aug 2021

CGPA: 7.95/10

CERTIFICATIONS

AWS Academy Cloud Foundations · AWS Academy Cloud Security Foundations
